

RE: European Union REACH Program Substances of Very High Concern (SVHC's)

To Whom it May Concern:

The new European Union REACH (Registration, Evaluation, and Restriction of Chemicals) Regulation has notification requirements for Substances of Very High Concern (SVHC). The notification requirements apply to any supplier that exports preparation or chemical substance into the EU that contains one or more SVHC.

Companies are required to notify their customers if their products contain any of the SVHC's at any concentration.

Cortec Group (Cortec Corporation USA, Ecocortec d.o.o. and Cortecros d.o.o. both Croatia) hereby inform you that none of the substances listed as SVHC are present in any of Cortec Group's products.

Boris Miksic FNACE
